

CBD  
American Shaman™

# CBGo

## WATER SOLUBLE

### 4 KEY FACTS

#### **What is CBGo?**

CBGo is the world's first CBG oil powered by nanotechnology. Made with a unique blend of phytocannabinoids from naturally-grown hemp plants, CBGo helps you focus on the task at hand and gives you the energy you need to power through your day, all without the negative effects of caffeine.

#### **Why is CBGo a history-making product?**

Everyone knows the major cannabinoids CBD and THC. American Shaman is making history by focusing on minor cannabinoids for their unique effects. CBGo harnesses the power of CBG to bring an effective plant-based product to disrupt the \$53b energy consumables industry (Allied Market Research). American Shaman takes it one step further with nanotechnology that radically increases the potency of CBGo.

#### **How does CBD American Shaman's nanotechnology make CBGo unique?**

When viewed under a microscope, the cannabinoids in hemp oil are locked up in fatty globules. When hemp oil is ingested, the body has to break up these globules to "unlock" the cannabinoids. Our nanotechnology shatters the oil apart, reducing the size of each particle down to the nanometer scale, making CBGo work faster and stronger than any competing CBG oil.

#### **Where is the cannabinoid industry headed?**

The health supporting properties of CBD are well known, including relief from everyday stress, mood support, enhanced focus and more. The future of the cannabinoid industry is marketing scientific formulations of cannabinoids and terpenes for specific consumer needs. With American Shaman leading the push into minor cannabinoids by marketing CBGo, the rest of the industry is sure to follow.
